Service User Engagement – Have your say about the future of day services from the 3rd sector: Adele McCormack (Service User Engagement Worker. Adult Mental Health. Cambs)

Introducing the new Springbank: Specialist ward for women with a diagnosis of personality disorder: a different place (TBC)

Patient & Carer Engagement Updates from CPFT: Ian Clift (Associate Director Patient Experience and Nursing/Patient and Carer Experience Trust Representatives)

Working Together is a well established informal network that meets on a quarterly basis and is open to all. No need to book – just turn up.

The list of organisations and individuals involved is extensive and includes the local statutory and 3rd sectors (including service user-led organisations), current and ex- service users, carers and a range of staff working in adult mental health services.

The quarterly forums are for sharing information particularly about new developments/changes in local services, topics of interest within mental health and about promoting recovery values and innovation.
